

## Employee Profile

Name: Aaron Stulc  
Title: Occupational Health & Safety Specialist  
Location: Glendive/Billings Districts

### **Tell us about yourself...**

I'm a new hire who started October 2008. I was born in Lewistown Montana because my mother was not going to have a home birth (we lived on the Missouri River bottom between Winifred and Big Sandy you can still see the old house next to the bridge). My dad still ranches in Winifred. I was raised all over Montana and went to HS in Glendive. Off to UM for further education (academic and other) and work till I got married and moved to Portland, Oregon. I golf as much as possible as well as hunt and annoy my wife by watching sports on TV. I also enjoy brewing and consuming fine beers.

### **Why do you work at MDT...**

There are not a lot of Health and Safety Career Opportunities in Montana. When the opportunity came up I jumped.

### **Job duties ...**

Promote and implement employee health and safety programs every way possible.

### **A typical day...**

If I'm not traveling, which I do a lot, I am communicating on outlook, setting up trips to see crews, researching safety topics, and consulting management on issues which come up. I hope to get in the field as much as possible and be a tool for employees and management to use to improve employee health.

### **Qualities needed for the job ...**

Multi-tasking, ability to relate to a wide variety of people. Working for two districts, organization is a must. Also have to learn a lot of names and faces.

### **Favorite thing(s) about working at MDT...**

So far, it's the people. Everyone has been great.
